

Integrated Decentralized Clinical Trial (DCT) Solutions for Complex Trials

ADDRESSING THE CHALLENGES OF RUNNING CLINICAL TRIALS WITH LIMITED PATIENT POPULATIONS PARTICULARLY FOR RARE AND ULTRA-RARE DISEASES.

Veristat designs a **flexible virtual trial approach** to accommodate patient needs and program objectives – **fully integrated** into our day-to-day operations across all solutions and **customized** for your trial by one global team. You can choose which DCT solutions to apply based on what makes sense for given aspects of your study.

“Interoperability is the name of the game in DCT, requiring that we not only take into consideration the technologies being deployed, but also the people and the processes being impacted. At Veristat, we have uniquely combined our full-service offering with our DCT solutions to create an approach, customizable to the needs of each patient and the trial design.”

Shaheen Limbada, EVP of Innovation and Strategy at Veristat

WHEN TO CONSIDER DCT SOLUTIONS

Rare Diseases

Biologics

Rare Cancers

Cell & Gene Therapies
